PEtec: In pursuit of product perfection

PEtec, "Precision Edge Technology" is *WÜSTHOF*'s most recent advancement in the pursuit of product perfection, setting the standard for modern cutlery manufacturers.

Conventionally hand sharpened knives are plagued by geometric irregularities which impair the cutting performance. *WÜSTHOF*'s PEtec knives have overcome this problem, resulting in a smoother, sharper and more refined cutting experience.

Independent tests have determined that *WÜSTHOF* knives with the PEtec edge are 20% sharper and retain their cutting performance twice long as *WÜSTHOF* knives without.

PEtec technology:

- Computer controlled robotics
- Ideal edge angle
- Consistent finish throughout the entire cutting edge

The benefits:

- Remarkable initial cutting performance
- Extraordinary edge retention
- Consistent performance from knife to knife
- Simple honing steel maintenance retains the cutting performance
